

Answer Key: Eat Well, Move More Worksheet

Teacher's copy — do not distribute to students

Section	Tasks	Marks	Notes
Part A — Comprehension	A1, A2, A3	20 marks	1 mark per correct answer
Part B — Vocabulary	B1, B2	20 marks	1 mark per correct answer
TOTAL		40 marks	

PART A — COMPREHENSION ANSWERS

Task A1 — True / False / Not Given [7 marks]

Accept only TRUE / FALSE / NOT GIVEN (or T / F / NG). No partial marks.

- FALSE** *The article says you do NOT need strict rules — 'a balanced diet is not about strict rules'.*
- TRUE** *Part One: 'Regular consumption of highly processed food is strongly linked to obesity, type 2 diabetes, and cardiovascular disease.'*
- TRUE** *Part Two: 'The WHO recommends at least 150 minutes of moderate physical activity per week.'*
- FALSE** *The article describes walking as 'free, accessible to almost everyone' — the opposite.*
- TRUE** *Tip grid: 'Poor sleep disrupts hunger hormones, increases cravings for processed food, and weakens the immune system.'*
- NOT GIVEN** *The article says exercise is 'one of the most effective treatments' for mild depression — not that it prevents it entirely.*
- TRUE** *Part Three: 'What matters is the pattern — the habits you build and sustain over months and years.'*

Task A2 — Note Completion [9 marks — one word only]

Accept only the exact word from the article as listed. Do not accept synonyms unless noted.

- nutrients** *Part One: 'A balanced diet ... giving your body the right mix of nutrients'.*
- repair** *Part One: 'protein, which builds and repairs muscle and tissue'.*
- fats** *Part One: 'often high in added sugar, salt, and unhealthy fats'.*
- portion** *Part One: 'Even healthy food can contribute to weight gain ... without portion control'. Accept: 'portion control'.*

12.	endorphins	Part Two: 'triggers the release of endorphins — chemicals in the brain that improve mood'.
13.	sedentary	Part Two: 'people who lead sedentary lifestyles ... have significantly lower rates'.
14.	depression	Part Two: 'one of the most effective treatments for mild to moderate depression'.
15.	appetite	Tip grid: 'Chronic stress raises cortisol, which increases appetite and promotes fat storage.'
16.	immune	Part Three: 'helps the immune system function at its best'. Accept: immune system.

Task A3 — Short Answer Questions [4 marks — 1 mark each]

Award 1 mark for any answer that clearly conveys the key idea in the student's own words. Do not penalise grammar errors if meaning is clear.

17.	Whole foods are rich in nutrients and lower in calories; processed food is high in sugar, salt, and fat but low in vitamins and minerals.	Key idea: whole foods = nutrient-rich; processed food = high in unhealthy additives, low in nutrients.
18.	It also strengthens the heart, improves metabolism, builds bones and muscles, releases endorphins, and helps treat depression.	Accept any two or three benefits listed. Key idea: benefits extend beyond weight to heart, bones, brain, mood.
19.	Small daily choices about food, exercise, and sleep add up over time to shape metabolism, immunity, and risk of disease.	Key idea: consistency over time. Accept: 'habits build up' / 'small changes have a big effect over months and years'.
20.	You do not need to be perfect — what matters is building consistent positive habits over time.	Key idea: consistency / patterns over time, not perfection. Accept any phrasing that captures this idea.

ANSWER KEY — PART A · EAT WELL, MOVE MORE

**KEY-
A**

PART B — VOCABULARY ANSWERS

Task B1 — Vocabulary Matching [8 marks]

1.	c — balanced diet	'a diet that contains the right amounts of all different food groups'
----	--------------------------	---

2.	d — nutrients	<i>'substances in food the body needs to grow and stay healthy'</i>
3.	e — cardiovascular	<i>'relating to the heart and blood vessels'</i>
4.	a — metabolism	<i>'chemical processes by which the body converts food into energy'</i>
5.	b — sedentary	<i>'spending most time sitting or lying down; extremely inactive'</i>
6.	h — endorphins	<i>'brain chemicals released during exercise that improve mood'</i>
7.	f — portion control	<i>'managing how much food you eat at one time'</i>
8.	g — obesity	<i>'condition of being dangerously overweight in a way that harms health'</i>

Task B2 — Gap-Fill [12 marks — 1 mark per gap]

Award 1 mark per blank filled correctly. Sentences 9, 11, 12, 13, 14, 15, 17 each require 2–3 answers — mark each blank independently.

9.	balanced diet / nutrients / carbohydrates (or protein)	3 blanks — 1 mark each. Accept protein OR carbohydrates for the third gap.
10.	wholegrains	1 blank.
11.	processed food / obesity / chronic disease	3 blanks — 1 mark each. Accept cardiovascular disease for the third gap.
12.	calories / portion control	2 blanks — 1 mark each.
13.	cardiovascular / metabolism / endorphins	3 blanks — 1 mark each.
14.	sedentary / physical activity	2 blanks — 1 mark each.
15.	metabolism / hydration	2 blanks — 1 mark each.
16.	immune system	1 blank — accept 'immune' only or 'immune system'.
17.	wellbeing / chronic disease	2 blanks — 1 mark each.

MARKING SUMMARY

A1 (T/F/NG): 7 marks · A2 (Note completion): 9 marks · A3 (Short answer): 4 marks · B1 (Matching): 8 marks · B2 (Gap-fill): 12 marks · TOTAL: 40 marks
