

Answer Key: The True Cost of Food Worksheet

Teacher's copy — do not distribute to students

Section	Questions	Marks	Notes
Part A — Paragraph Matching	14–17	4 marks	1 mark each
Part B — Yes / No / Not Given	18–21	4 marks	1 mark each
Part C — Summary Completion	22–26	5 marks	1 mark each; max 3 words per gap
Part D — Vocabulary Matching	27–34	8 marks	1 mark each
TOTAL		21 marks	(+ 5 for Q26 double gap = 26 total)

PART A — PARAGRAPH MATCHING [4 marks]

Accept only a single letter A–G. Any letter may be used more than once. No partial marks.

14. **E** £120m for removal of pesticides / £23m for cryptosporidium / £16m for nitrates — all in paragraph E.
15. **B** Paragraph B lists the stages: mechanisation → fertilisers/pesticides → monocultures → battery farming → genetic engineering.
16. **C** Paragraph C: 'the costs ... are what economists refer to as externalities.'
17. **B** Paragraph B: 'the growth of algae is increasing in lakes because of the fertiliser run-off.' Also accept E (pesticides/nitrates in water).

PART B — YES / NO / NOT GIVEN [4 marks]

These are writer's CLAIMS — not simply facts. Accept YES / NO / NOT GIVEN or Y / N / NG.

18. **YES** Paragraph B explicitly states that farmland birds, wild flowers, and insects have vanished from large areas.
19. **NOT GIVEN** The writer mentions environmental and health damage but makes no claim about the taste of food.
20. **NO** Paragraph C explicitly states that consumers 'rarely make the connection' — the opposite of 'widely recognised'.
21. **YES** Paragraph E: '£169m from food poisoning' — illness caused directly by food is listed as one of the calculated costs.

PART C — SUMMARY COMPLETION [5 marks + 1 bonus = 6]

Accept only words taken directly from the passage. Maximum **THREE WORDS** per answer. Do not accept synonyms or paraphrases. Question 26 has two answers — award 1 mark each.

22.	food bills	Paragraph E: 'Professor Pretty draws a simple but memorable conclusion ... our food bills are actually threefold.'
23.	industrial agriculture	Paragraph F: 'Breaking away from industrial agriculture ... in Britain ... it may be more feasible.'
24.	organic farming	Paragraph G: 'Professor Pretty feels that organic farming would be too big a jump ... for many farmers.'
25.	Greener Food Standard	Paragraph G: 'He is recommending the immediate introduction of a "Greener Food Standard".' Accept with or without quotes.
26.	consumers / farmers (both required — 1 mark each)	Paragraph G: 'shifting consumers as well as farmers towards a more sustainable system.'

PART D — VOCABULARY MATCHING [8 marks]

27.	d — collateral damage	Unintended harm caused as a side effect of an action.
28.	b — externalities	Costs not paid by those directly involved in a transaction.
29.	e — intensive farming	Agriculture using chemicals and machinery to maximise yields.
30.	a — monocultures	Growing a single crop over large areas, year after year.
31.	g — enervation	Gradual weakening or loss of strength and vitality.
32.	h — subsidies	Government payments that support an industry by reducing costs.
33.	c — price premium	A higher price charged for a premium product such as organic food.
34.	f — sustainable	Able to continue long-term without causing permanent damage.

MARKING SUMMARY

Part A (Paragraph matching): 4 marks · Part B (Y/N/NG): 4 marks · Part C (Summary): 5 marks · Part D (Matching): 8 marks · TOTAL: 21 marks (+ 1 bonus for both answers in Q26 = 22 marks maximum)
